Carrying The Heart Exploring The Worlds Within Us

The heart contains 4 chambers: the right atrium, left atrium, right ventricle, and left ventricle. The atria are smaller than the ventricles and have thinner, less muscular walls than the ventricles. The atria act as receiving chambers for blood, so they are connected to the veins that carry blood to the heart.

Human Heart - Diagram and Anatomy of the Heart

The two sides of your heart are separate, but they work together. The right side of the heart receives de-oxygenated blood which has circulated around your body; It pumps this to your lungs, where it picks up a fresh supply of oxygen. The blood then returns to the left side of the heart, ready to be pumped to your body.

How your heart works - Heart and circulatory system ...

Blood is pumped away from the heart at high pressure in arteries, and returns to the heart at low pressure in veins. The human circulatory system is a double circulatory system.
