Chapter 2: Parts of Speech Overview, E B pp.25–45

2.1 The grammar of graphics. We start with a discussion of a theoretical framework for data visualization known as "the grammar of graphics." This framework serves as the foundation for the ggplot2 package which we'll use extensively in this chapter. Think of how we construct and form sentences in English by combining different elements, like nouns, verbs, articles, subjects, objects, etc.

Outline. Section 2.2 introduces you to the distinction between

names and values, and discusses how <-creates a binding, or reference, between a name and a value.. Section 2.3 describes when R makes a copy: whenever you modify a vector, you're almost certainly creating a new, modified vector. You'll learn how to use tracemem() to figure out when a copy actually occurs.
