Evolution - Evolution - History of evolutionary theory: All human cultures have developed their own explanations for the origin of the world and of human beings and other creatures. Traditional Judaism and Christianity explain the origin of living beings and their adaptations to their environments—wings, gills, hands, flowers—as the handiwork of an omniscient God.

### Evolution - History of evolutionary theory | Britannica

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction.Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

### Evolution - Wikipedia

Given these types of discoveries, it may be better to think about human evolution as a “braided stream,” rather than a “classical tree of evolution,” says Andrew C. Sorensen, a ...

### How Did Humans Evolve? - HISTORY

Inheritance of acquired characteristics was part of Haeckel's recapitulation theory of evolution, which held that the embryological development of an organism repeats its evolutionary history. [101] [102] Critics of neo-Lamarckism, such as the German biologist August Weismann and Alfred Russel Wallace, pointed out that no one had ever produced solid evidence for the inheritance of acquired ...

The history of advertising has experienced several major milestones – think the emergence of the printing press in the 1440s, or the huge impact of television. Since its very first beginnings, which are thought to date back to steel carvings made by the ancient Egyptians, advertising has constantly had to adapt and change to suit new mediums and an increasingly savvy audience.
