Background: In physiotherapy education, cognitive knowledge is combined with psychomotor skills classes. Evidence that psychomotor skills can be acquired by Video-Based Learning (VBL) only is scarce. The purpose of the research was to compare VBL with face-to-face learning of one such skill (Proprioceptive Neuromuscular Facilitation, PNF) and to assess students' acceptance of VBL.

Video-Based Learning Compared to Face-to-Face Learning in ...

Ansalone and Biafort (2004) showed in their study that 70% of teachers reported adjusting classroom presentation according to the ability group while an even percentage reporting that more time is needed to cover the lesson in the low-ability tracks. Seventy-one percent employed "special teaching techniques" in aiding the delivery of instruction by track. According to 62% of teachers, more ...
