### PostgreSQL 9.4.26 Documentation

They are shown in Table 9.22. A back reference (\n) matches the same string matched by the previous parenthesized subexpression specified by the number n (see Table 9.23). For example, ([bc])\1 matches bb or cc but not bc or cb. The subexpression must entirely precede the back reference in the RE. Subexpressions are numbered in the order of ...
