### Free Executive Summary - NSF - National Science Foundation

The physical science curriculum covers the natural sciences and nonliving systems. Students focus on learning overall concepts and theories to help them understand and explain aspects of nature. Across the country, different states have different opinions on what should be included in physical science.

### High School Science Curriculum Plan of Study

Science education is one of the most important subjects in school due to its relevance to students' lives and the universally applicable problem-solving and critical thinking skills it uses and develops.

### Importance of Science Education in Schools | UTA Online

Most high schools require students to complete two to three years of science classes in order to graduate. These classes often include a laboratory component in which students must conduct hands-on experiments as part of the class. The course sequence for science classes in most US high schools goes like this: Biology → Chemistry → Physics

### The High School Science Classes You Should Take

Thank you both so much!! I've spoken with one of my potential Biology professors. She told me not to take any science courses online; it's difficult for students understand the concepts of Biology. She definitely didn't recommend taking online science courses. :) Thanks again for being so helpful!!

### Taking science course online vs. in class? - Online ...

Science is explorational. Science is about making discoveries, more specifically in a broad range of fields, which students are free to explore. At Hopkins, there is an endless amount of science courses, and each course offers a unique spin on research, advancements, and relevant technologies involved with the class' topic. 7.
