Shown to the right is a PV diagram with two adi-atic lines $1 \rightarrow 2$ and $2 \rightarrow 3$, assumed to intersect at point 2. A cycle is formed by an isothermal line from $3 \rightarrow 1$. An engine traversing this cycle would produce work. For the cycle $\Delta U = 0$, and therefore by the first law, $Q + W = 0$.

File Type PDF Thermodynamics 7th Edition Solution Smith Van Ness

Since W is negative, Q must be positive, indicating that heat is absorbed by the system.
