Urban and Regional Economics - Institute for New Economic ...

Urban economics is broadly the economic study of urban areas; as such, it involves using the tools of economics to analyze urban issues such as crime, education, public transit, housing, and local government finance. More specifically, it is a branch of microeconomics that studies urban spatial structure and the location of households and firms. Much urban economic analysis relies on a particular model of urban spatial structure, the monocentric city model pioneered in the 1960s by William Alonso

Urban economics - Wikipedia

Urban and regional economics encompasses both the economics of geography and spatial economics to focus on the growth, behaviour, and economic performance of cities and regions.

Urban and Regional Economics - 1st Edition - Philip McCann ...

As early as the 1960s, the urban and regional economics literature (e.g. Chinitz, 1961; Vernon, 1960) argued that non-tradable intermediate goods (primarily producer services produced under conditions of increasing returns to scale) are an important source of agglomeration externalities that account for the formation of cities and industrial complexes, and account for differences in economic performance across regions.
